JAWS®

A monstrous great white shark is terrorising the beaches of Amity Island. A grim discovery confirms the worst – he's out there and he's hungry. In a bid to save the Island's falling tourist trade, Mayor Vaughn engages a professional shark killer from the mainland. Unfortunately, en route, a fierce storm wrecks his boat, and the means of JAWS' destruction is scattered throughout the caves and chasms of a menacing sea world.

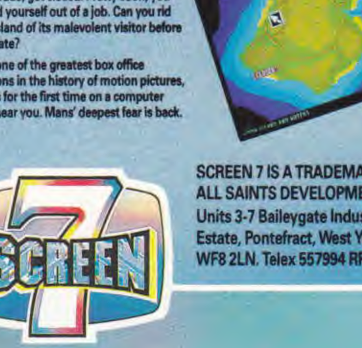

In desperation, Mayor Vaughn turns to you, Police Chief Brodie. With your two colleagues, Hooper, the shark expert, and Quint, the manic shark hunter, you set off to retrieve the lethal weapons from the sea bed and kill the unwelcome intruder. Unfortunately, JAWS has other ideas.

Whilst JAWS roams the clear water bringing a swift and horrible end to unwary swimmers, you must undertake hazardous deep sea dives into a world teeming with hostile life and full of unforeseen dangers. To make matters worse, Mayor Vaughn is getting impatient. As the death toll rises, the beaches, essential for the Island's tourist trade, get closed. Pretty soon, you may find yourself out of a job. Can you rid Amity Island of its malevolent visitor before it's too late?

JAWS, one of the greatest box office attractions in the history of motion pictures, surfaces for the first time on a computer screen near you. Mans' deepest fear is back.

Screen Shots may be taken from a different machine version
